

Our Growth Continues...

is pleased to announce
the addition of

Fritts Golden, MRP, AICP

- Land Use Planning
- Policy Development
- Environmental Compliance and Permitting
- Natural Resources Management Planning
- Public Involvement

In the past year, Aspen has been awarded several large contracts. To ensure that we remain responsive to our clients, we have hired two exceptionally capable senior staff with the experience needed to manage the large energy and infrastructure projects in which Aspen specializes.

We are pleased to announce the newest addition to our staff, **Mr. B. Fritts Golden, AICP**. **Mr. Golden** is joining Aspen's San Francisco office as a Senior Project Manager.

Mr. Golden has a long-standing relationship with Aspen, having worked with Aspen project teams in the past. He has broad expertise preparing environmental documents for infrastructure projects and has experience working with a number of Aspen clients, including the California Public Utilities Commission, the US Minerals Management Service, and the US Army Corps of Engineers.

**B. Fritts Golden,
MRP, AICP**
Senior Project Manager
Certified Planner

Fritts Golden has 29 years of land use and environmental analysis experience covering a wide range of issues and project-types. His background is in both planning and biology. During his career, his work has focused on land use planning, policy development, public involvement, environmental compliance and permitting, biological assessments, and natural resources management planning. Many of his assignments have required the management of interdisciplinary teams. **Mr. Golden's** technical expertise covers a number of subjects. These include land use planning, environmental impact analysis, policy formulation, military installation reuse, facility siting, natural resources planning, interagency coordination, and community participation programs. He has authored numerous CEQA and NEPA documents for local, state, and federal agencies throughout the US.

Aspen also welcomes **Aubrey Mescher, MESM, and Wendy Bear**.

Ms. Mescher studied Water Resources at the Donald Bren School of Environmental Science and Management. As an Environmental Planner in our Agoura Hills office she will support various management teams with CEQA and NEPA infrastructure projects.

Ms. Bear has a B.S. in Aquatic Biology from UC Santa Barbara and as a Staff Biologist will be conducting surveys and providing biological support from Agoura Hills.
